

Intelligent document automation for healthcare

MediFlow turns clinical and administrative documents into **reliable, actionable data**.

WHAT IS MEDIFLOW

A platform that turns documents into **actionable information**

MediFlow is the automation platform that transforms clinical and administrative documents into reliable, actionable data.

Using advanced **OCR, AI and intelligent workflow** technologies, MediFlow interprets, extracts and structures critical information with clinical precision.

The goal is to reduce operational workload and raise efficiency across every stage of the healthcare process.

- 1 Interprets clinical and administrative documents.
- 2 Extracts critical information with precision.
- 3 Structures data so it can be processed.
- 4 Reduces operational workload for teams.
- 5 Raises efficiency across healthcare processes.

PROBLEM SOLVED

Operational agility for an environment that **cannot wait**

In healthcare institutions, every minute counts. Incomplete forms, manual scanning and slow validations create delays that affect both staff and patients.

Process documents in seconds

Automates capture tasks that normally require manual review.

Reduce capture errors

Minimizes errors in sensitive data during digitization and validation.

Ensure traceability and compliance

Organizes information flows to support auditable processes.

Scale without adding resources

Speeds up care delivery and onboarding with greater operational capacity.

HOW IT WORKS

An automated flow combining **interpretation, validation and integration**

01

Advanced interpretation

Reads medical orders, consent forms, IDs, results, claims and more.

02

Accurate extraction

Extracts key data with high precision, even from loosely structured images.

03

Intelligent validation

Verifies validity, consistency and accuracy of captured data.

04

Transparent integration

Connects with clinical and administrative systems to automate critical processes.

GENERATED IMPACT

Immediate impact on **daily operations**

MediFlow's intelligent automation reduces processing times and minimizes errors in sensitive data.

This frees clinical and administrative teams from manual tasks, allowing them to focus on patient care.

80%

less processing time

Less administrative workload

For clinical and administrative teams.

Faster patient experience

A more modern and fluid journey.

Higher productivity

More care capacity without adding resources.

WHY MEDIFLOW

A scalable, secure platform ready for the **future of healthcare**

MediFlow combines intelligence and automation to optimize processes that traditionally depend on manual intervention.

Smarter operations

Healthcare processes that rely less on repetitive tasks.

Reliable information

Structured data with precision, security and efficiency.

Faster response

Less friction between documents, validations and systems.

Connected processes

End-to-end integrated flows for healthcare operations.

IC Medi Flow

Digital solutions designed to optimize processes and **support organizational evolution.**
